
The problem of the missing Employment expert medical commission for blind people in Burgas region is solved. Medical examinations for those who are waiting their turn start on 1st February. As a result of the common efforts of the Governor and the health institutions in Burgas the executive director of the Burgas Multiprofile Hospital Dr. Georgi Matev has already concluded a contract with an ophthalmologist who will examine the eye status of the blind patient and present it to the working staffs of the Employment expert medical commission. The statements of the ophthalmologist will be adopted by the commissions and they will take a decision about the disability percentage of the patients. Till now these people needed to go travel to Varna and Sofia. In Burgas 310 blind people are registered in the database of the Employment expert medical commission. Their records have been already sent from the special Employment expert medical commission for eye diseases in Varna to the Regional database of medical expertise in Burgas. The chairman of the Regional union organization of blind people Binka Moneva expressed her thanks to the institution for solving the problem.
