An eurofunding is to find for the construction of a new building suiting the contemporary requirements, where the Urgent Medical Center in Burgas will be located. In the new programme period through the opportunities of the program "Regions in growth" the Ministry of public health will work on ensuring investments for urgent medical aid and all its branches. During their visit today to Burgas Deputy Ministers Dr Adam Persensky and Dr Vanyo Sharkov have asked officially for a construction spot to be located in the area of the Burgas Multiprofile Hospital. This is the solution to one of the problems presented predominantly by the Governor Valcho Cholakov to the Health Ministry a couple of days ago. This subject have been discussed by him also during the meeting with the Members of Parliament of Burgas region in the beginning of the week. The construction of a new Urgent Center building will solve a problem of many years related to multitude of movings and remoteness of the teams from managing staff and administration. Before the meeting with the Governor the Deputy Ministers visited the Burgas Multiprofile Hospital where they got acquainted with the implementation of the project for building of Early Diagnose Center for oncological diseases. Both Deputy Ministers committed themselves to cooperate for another important project of Burgas Multiprofile Hospital – the Transfusional Haematology Ward (Blood Center) which has not been overhauled for 40 years.
