

---

Governor Valcho Cholakov and Mayor Vasil Edrev of Aytos municipality turned the first sod of the modular purifying installation for waste water in Pirne village, Aytos municipality.

Financing comes from the State Fund "Agriculture" in an amount of 300 000 BGN. The Municipality of Aytos will effect additional payment for construction which will be finished at the end of May this year.

The purifying installation project is a continuation of the construction project of Aytos Municipality for waste water sewage in Pirne financed by the Program for development of rural regions in an amount of 2 433 362,40 BGN. It has been successfully finished last year.

Governor Cholakov expressed his approval to the Mayor, the administration and the local parliament for the initiative. "My personal wish is that more Bulgarian villages could boast of sites like this one." – addressed Governor Cholakov to the people of Pirne. .
