

---

For a fifth year in succession in Burgas has been held a chess tournament for disabled people dedicated to The National Day of Bulgaria – 3. March. Traditionally in this competition take part members of the Regional organisations of blind and deaf people as well as Burgas Social Centre Society being at the same time tournament organizers. As a tradition in the event participate also representatives of Burgas Regional Administration. This year Deputy Governor Sevdalina Turmanova has bid a welcome to the contest participants assuring them that in the person of the institution represented by her they have a good partner and can always rely on its support and assistance.

The people took the opportunity to thank the Deputy Governor for the quick solution the Regional Administration found for a problem of many years which bothered people with visual disablements. It was the lack of Employment expert medical commission for blind people in Burgas. After intervening of Governor Valcho Cholakov in the problem an oculist has been already appointed in Burgas Multiprofile Hospital and the eye-disabled people do not need to travel anymore to Sofia and to Varna to get an expertise.
