According to Governor's Cholakov order a joint committee has been constituted which will control in April the state of the potential dangerous dams in Burgas Region. Within 10 days experts from defferent state administrations will visit the water bodies in 10 municipalities. Experts of the Basin Directorate, Fire Department, Dams and Cascades, Agriculture Directorate will inspect the observation of the instructions for the water basins' level and the availability of free volumes, their technical state as well as the river beds' capacity. Till now the inspections have been conducted twice a year according to schedule. After Cholakov's order and with the aim of continuous control these inspections will be conducted throughout the year.
