

---

On the Day of Botev pupils of 9,10 and 11 class of the Highschool "Hristo Botev" in Karnobat visited Burgas Regional Administration. They wore T-shirts with the image of the poet-revolutionary when they met Governor Valcho Cholakov and his Deputy Vladimir Krumov. The conversation about activities and functions of administration, about life and choices we have to do took almost an hour. The pupils were prepared with numerous questions about how to choose the right profession, what is the way walked by both hosts until they held their posts, have they chosen their speciality in higher education by themselves or have they followed someone's other examples. Cholakov and Krumov told of events in their personal and professional lives and invited those who would need a practice during their higher education to come to the administration.

When the conversation finished the pupils took a look at the building and got acquainted with its history.
