

---

Since June a cleaning by stages has been started of the most critical sections of river beds in Burgas region. For that purpose Governor Valcho Cholakov has required toward the Principal of the prison the labour of a group of imprisoned persons. According to a specially drawn up schedule and after bringing it in line with the municipalities gullies, river beds, channels and dams managed by the Governor of Burgas Region will be treated with preparations and manually cleaned till 31 August. These unpopular measures taken by the Regional Administration are part of the prevention for non-admission of crisis situations, floods and for ensuring the citizens' protection. According to the last report the amount needed for cleaning of the water sites in the region is 7,5 million and should be provided by the Joint Committee of disasters and accidents.
